

Ed - items covered on last page can be handled ad hoc by EIC without changing DCED 3/1. I would approach any change in DCED with considerable caution. As you know it could create more problems than it solves. I'd not like

To see the EIC get in the hand of interagency review of NIS etc that the SDC now handles. In essence I'm on the negative side of this but you probably ought to see whether constructive changes should be made. Bill
